-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 11 March 2005.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 6, 8 and 9 are rejected under 35 U.S.C. 102(e) as being anticipated by Obana et al. (USPN 6555779 B1).

Obana teaches an installation (501) for laser welding comprising a laser (504) , a filler wire guide, a head with multiple drillings (openings) passing through the head converging toward each other, two gas ejection pipes (519,520) and means for adjusting the position of the head (536) (figure 5 and col 15 line 50 – col 16 line 22).

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 1725

4. Claim 7 is rejected under 35 U.S.C. 103(a) as being unpatentable over Obana et al. (USPN 6555779 B1) in view of Tomassini et al. (USPN 4475788).

Obana teaches an installation (501) for laser welding comprising a laser (504), a filler wire guide, a head with multiple drillings (openings) passing through the head converging toward each other, two gas ejection pipes (519,520) and means for adjusting the position of the head (536) (figure 5 and col 15 line 50 – col 16 line 22). However the means for adjusting the position of the head is not further disclosed.

Tomassini teaches a method of moving a laser device with a micrometric table (figure 2 and col 1 line 62 – col 2 line 5 and col 2 lines 22-30).

It would have been obvious to one of ordinary skill in the art at the time of the invention to use a micrometric table to move the tool in a careful yet precise manner.

5. Claim 10 is rejected under 35 U.S.C. 103(a) as being unpatentable over Obana et al. (USPN 6555779 B1) in view of Lefebvre et al. (USPN 6608285 B2).

Obana teaches an installation (501) for laser welding comprising a laser (504), a filler wire guide, a head with multiple drillings (openings) passing through the head converging toward each other, two gas ejection pipes (519,520) and means for adjusting the position of the head (536) (figure 5 and col 15 line 50 – col 16 line 22). However the welding means are not further disclosed.

Lefebvre teaches an installation for welding with a CO₂ or YAG laser sources and a MIG, TIG or MAG arc welder (col 1 lines 21-40, col 3 lines 9-20 and col 4 line 19).

It would have been obvious to one of ordinary skill in the art at the time of the invention to use conventional lasers such as CO₂ and YAG and to use known arc welding means such as MIG and MAG to produce consistent, reliable welds (Obana, col 23 line 60 – col 24 line 4).

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Takikawa et al. (US 2004/0000539 A1), Sonoda et al. (US 2004/0232130 A1), Dykhno et al. (US PN 6388227 B1) and Walduck (USPN 5866870).
